

Amit Birenboim is a postdoctoral researcher in the Faculty of Geosciences at Utrecht University as part of the Healthy Urban Living Programme. His main research interests include health geographies, tourists' spatial activity and the study of individuals' momentary subjective experiences. In his studies he implements advanced tracking technologies such as GPS and smartphones which allow researchers to accurately track the movement patterns of people and geo-tag their thoughts and experiences. As part of his work, Amit took part in several international projects in the fields of tourism and health.
